Associate Dean-cum-Principal

Agricultural Entomology is a very fascinating subject which deals with many beneficial as well as harmful insect to the mankind but before going in to details of all, the basics of entomology is must for any of the agricultural students and the course 'Fundamentals of Entomology' which is offered to B.Sc (Agri.) Hons. students is one which provide best opportunity for understanding basics of Entomology viz. Collection of insects, Insect Morphology, Insect Physiology, Insect taxonomy, Insect Ecology and IPM concepts in most simple way. The manual has been prepared according to the new syllabus (V Dean Committee) given by ICAR, New Delhi in a simple and easily understandable manner keeping in view of each and every undergraduate as well as post graduate students. It is very useful for students in acquiring practical skills both in insect morphology and insect physiology which is the foundation for all.

The authors need to be appreciated for their sincere efforts in preparing practical manual for the students. The efforts made by the authors in bringing out lot of scientific information in a most systematic manner need compliments.

CONTENTS

Practical Manual on
Fundamentals of Entomology

Exercise 1	Distinguishing Characteristics of Classes of the Phylum: Arthropoda	01
Exercise 2	Collection and Preservation of Insects including Immature Stages	06
Exercise 3	External Morphology of American Cockroach, <i>Periplanata americana</i>	15
Exercise 4	Types of Insect Mouth Parts	20
Exercise 5	Basic Structure and Types of Antennae, Legs, Wings and Wing Coupling Mechanisms	25
Exercise 6	Types of Insect Eggs, Larvae and Pupae	32
Exercise 7	Study of Digestive, Excretory, Circulatory and Respiratory Systems in Cockroach	38
Exercise 8	Study of Male and Female Reproductive and Nervous Systems in Cockroach	43
Exercise 9	Classification of class Insecta	47
Exercise 10	Characteristics of Apterygota orders	53
Exercise 11	Characteristics of Paleopteran orders and their Families Classification	57
Exercise 12	Characteristics of Polyneopteran / Orthopteroid orders and their Families	61
Exercise 13	Characteristics of Paraneopteran/ Hemipteroid orders and their Families	71
Exercise 14	Characteristics of Panaroid/ Oligoneopteran orders and their Families	81

AUTHOR DETAILS

Dr. Kalmesh Managanvi is working as Assistant Professor-cum-Junior Scientist, Entomology deputed at Dr. Kalam Agricultural College, Arrabari, Kishanganj under Bihar Agricultural University, Sabour Bhagalpur. He acquired his Master as well as Ph.D degree in Entomology from G.B. Pant University of Agriculture and Technology, Pantnagar Uttaranchal. He was the recipient of ICAR's JRF during Masters Degree and DST Inspire Fellowship during Ph.D degree programme. He also received University Gold Medal from IGNOU, New Delhi for securing first rank in Post Graduate Diploma in Rural Development in 2013. He worked as Research Associate, at National Plant Quarantine Station, New Delhi.

Dr Chandra Shekhar Prabhakar is working as Assistant Professor-cum-Junior Scientist, Entomology deputed at VKS College of Agricultural, Dumraon Buxar under Bihar Agricultural University, Sabour Bhagalpur. He completed his Master and Ph.D degree in Entomology from C. S. K. Himachal Pradesh Agricultural University, Palampur, Himachal Pradesh. He worked in many national and International institutes viz. BARC, Mumbai, ICRISAT, Hyderabad before joining to BAU, Sabour. He was recipient of SERB fellowship for completing Post doctorate at Queensland University of Technology, Brisbane, Australia.
